

PUBLIC TRANSPARENCY REPORT

2023

Litorina

Generated 15-12-2023

About this report

PRI reporting is the largest global reporting project on responsible investment. It was developed with investors, for investors.

PRI signatories are required to report publicly on their responsible investment activities each year. In turn, they receive a number of outputs, including a public and private Transparency Report.

The public Transparency Reports, which are produced using signatories' reported information, provide accountability and support signatories to have internal discussions about their practices and to discuss these with their clients, beneficiaries, and other stakeholders.

This public Transparency Report is an export of the signatory's responses to the PRI Reporting Framework during the 2023 reporting period. It includes the signatory's responses to core indicators, as well as responses to plus indicators that the signatory has agreed to make public.

In response to signatory feedback, the PRI has not summarised signatories' responses – the information in this document is presented exactly as it was reported.

For each of the indicators in this document, all options selected by the signatory are presented, including links and qualitative responses. In some indicators, all applicable options are included for additional context.

Responsible investment definitions

Within the PRI Reporting Framework Glossary, we provide definitions for key terms to guide reporting on responsible investment practices in the Reporting Framework. These definitions may differ from those used or proposed by other authorities and regulatory bodies due to evolving industry perspectives and changing legislative landscapes. Users of this report should be aware of these variations, as they may impact interpretations of the information provided.

Data accuracy

This document presents information reported directly by signatories in the 2023 reporting cycle. This information has not been audited by the PRI or any other party acting on its behalf. While this information is believed to be reliable, no representations or warranties are made as to the accuracy of the information presented.

The PRI has taken reasonable action to ensure that data submitted by signatories in the reporting tool is reflected in their official PRI reports accurately. However, it is possible that small data inaccuracies and/or gaps remain, and the PRI shall not be responsible or liable for such inaccuracies and gaps.

Section 1. Our commitment

- Why does your organisation engage in responsible investment?
- What is your organisation's overall approach to responsible investment, and what major responsible investment commitment(s) have you made?

At Litorina, we are convinced that our companies must have a sustainable and long-term approach to be successful. For us, sustainability is essential to drive long-term value creation. We recognize that our decisions and activities have an impact on the environment and on the people and communities where we and our portfolio companies operate. Litorina strongly believes that we as a private equity owner have a great opportunity to drive sustainability matters in our portfolio companies.

As active owners, it is our ambition to manage those impacts and promote sustainable business practices. We are committed to promote good business practices across our portfolio companies and at Litorina. Litorina also believes that companies which effectively manage environmental, social and governance ("ESG") risks and opportunities well are better positioned to increase their long-term value. As a result, ESG is an integrated part of our investment process and active ownership model. We use the United Nations Sustainable Development Goals ("UN SDGs") as a framework to assess risks and opportunities.

Section 2. Annual overview

- Discuss your organisation's progress during the reporting year on the responsible investment issue you consider most relevant or material to your organisation or its assets.
- Reflect on your performance with respect to your organisation's responsible investment objectives and targets during the reporting year. Details might include, for example, outlining your single most important achievement or describing your general progress on topics such as the following (where applicable):
 - refinement of ESG analysis and incorporation
 - stewardship activities with investees and/or with policymakers
 - collaborative engagements
 - attainment of responsible investment certifications and/or awards

Litorina has selected four core SDGs as our focus areas within sustainability. These four SDGs are (5) Gender Diversity, (8) Decent Work and Economic Growth, (13) Climate Action and (16) Peace, Justice and Strong Institutions. During the reporting year we have refined our investment process to be aligned with our commitment to Litorina's four core SDGs. Already in the screening phase we are looking for investments with a potential to improve on these SDGs as well as other company specific SDGs. This will be confirmed during the due diligence process where we also focus on exposure to sustainability risks and opportunities.

In our active ownership phase portfolio companies will, as part of their ESG onboarding, perform a materiality assessment that will identify key ESG areas for the company and will be asked to align these with the UN SDGs. These will then be tracked through meaningful KPIs so we during the exit phase can show the progress made and value-add from an ESG perspective during our ownership.

As a result of the incorporation of the UN SDGs into our investment process we have also established separate ESG due diligence streams. Previously, ESG matters were covered by other due diligence streams, but we feel that a separate ESG due diligence stream provides us with a better roadmap for us and our portfolio companies during our ownership.

To further emphasize the importance of sustainability work in our portfolio companies and to ensure progress we decided in the second half of 2022 to establish ESG committees in each portfolio company.

The ESG committee consists of the Litorina deal team, Litorina's Head of ESG as well as the CEO, Chairman of the Board and sustainability coordinator of the portfolio company. The ESG committees will meet regularly depending on the ESG maturity of the company.

We also launched an ESG onboarding framework describing the steps to be taken to be fully onboarded in our sustainability efforts, consisting of an ESG governance structure, ESG strategy and ESG reporting. In connection with the onboarding framework, we also developed an internal ESG rating system for our portfolio companies, where companies can develop to a five-star sustainable company.

In 2022 we started the first part of our climate work, where we appointed an external advisory firm to educate our portfolio companies on the different green house gas ("GHG") emission scopes and to review the environmental data for 2021 for our portfolio companies. The environmental data has been reviewed and calculated in accordance with the GHG Protocol and included the following scopes:

Scope 1.

Direct emissions

Scope 2. Purchased energy

Scope 3.3 Fuel and energy

Scope 3.6. Business travel

We have also been making preparations for the first SFDR article 8 periodic disclosures for Litorina V that need to be included in the 2022 annual accounts of the fund.

Lastly, we published our second annual sustainability report.

Section 3. Next steps

- What specific steps has your organisation outlined to advance your commitment to responsible investment in the next two years?

We will continue to work with sustainability in our portfolio companies in a structured manner. Our ESG onboarding framework will be introduced to all companies, we will be looking to start rating our portfolio companies (only for internal use) and make sure the ESG committees are monitoring progress.

We will also progress with the next steps of our climate work. Together with an external advisory firm we will be measuring our 2022 GHG emission, where we will be performing an analysis to define the most material scope 3 emission categories for our portfolio companies. We will try to increase the data collection for the scope 3 categorized based on this analysis as well as the maturity of the company and data availability.

As part of this project we will also develop a Litorina Climate Framework. A framework to guide Litorina and our portfolio companies to take climate action. The Climate Framework is intended to be used as a foundational part of Litorina's management of climate-related topics within our portfolio. It will allow Litorina to pursue annual improvements across our portfolio, and when assessing potential additions to the portfolio. For our portfolio companies we will be developing a Climate Handbook.

The Climate Handbook will include guidance for the portfolio companies to reduce their emissions and climate impact as well as improve their data collection.

Furthermore, we are in the progress of implementing a system that can support us in our ESG data collection process as well as monitoring of ESG KPIs and targets. Litorina has not opted in on the SFDR Principal Adverse Impact ("PAI") indicators yet, but will in the coming years perform a GAP analysis to understand how we need to work with our portfolio companies to be able to collect all the PAI indicators.
